4: Hobley G-5 (ca. 1900) 1902 FL11 Luo FL11

village is a long way off the girl's relations sleep at his village, but if they can manage to do so they return the same day. Next day the bridegroom's brothers and his other wives take the bride back to her father's village and there is a great feast and *temlo* drink; the bridegroom does not go. 585

The father of the girl next day presents his daughter with a goat and she returns to her husband. The girl's husband then continues to make payments to his father-in-law; the total amount it is necessary to pay varies from two to six cows; if he stops paying his wife will go off to her father's village and stay there for a month or so until the man resumes payments. Before the big attack of cattle plague in 1890 and 1891 it is said that as many as forty cows were sometimes paid for a wife. 583 585

If a woman does not bear her husband a child quickly the husband stops his payments, but the husband has no claim for the return of any of the property as long as the woman stays with him. If a wife dies and has borne no children the property is returned, or one of her sisters is given the man to wife and the man only pays about twenty goats for the sister. 583 587

If a woman will not stop with her husband she is married to some one else, and the first husband is repaid from what the second husband pays. If a woman has a child and is ill-treated she can leave her husband but the child belongs to him; if the child be a boy, when it grows up and the mother grows old she will generally come back to live with her son. If after a marriage has been arranged a father is loth to part with his daughter the young man employs his friends to waylay the girl in the daytime. If the girl however refuses to stay at her suitor's village and runs away, the property paid over is returned without delay and the match is broken off. If a woman remains unmarried for a longer period than usual she often goes off to a chief or someone with plenty of cattle and states that she intends to stay there and cook for him; in such a case she is usually taken to wife, but the man pays much less than is nominally customary. Chiefs have from ten to forty wives. They are generally speaking very moral in their domestic relations. They do not intermarry in the same clan, but a man will marry the daughter of a man named the same as himself. 586 583 [622 595] [582]

Pottery.—All pottery is made by women and is similar to that of the Bantu Kavirondo, and consists of water pots, cooking pots, *temlo* pots, etc. 323

Dyes; tanning.—These people do not use dyes, neither do they tan, but they soften skins by rubbing in fat and hand-working till soft. 281 386

Arms, etc.—Their shields were formerly made of buffalo hide but are now made of cow hide; the shields are usually very large, curving round the body of the man carrying it. They also make shields of ambatch wood (called *Orindi*). They have a great fancy for spears with shafts of enormous length, ten feet or more; the heads are very small and insignificant. Use simés and clubs to a small extent; the former weapons are however I think copied from the Masai or Nandi. Also use bows and arrows; the arrows were formerly poisoned, but 441

4: Hobley G-5 (ca. 1900) 1902 FL11 Lao FL11

poisoned arrows have fallen into disuse; there was a medicine man in Gessi country named Opondo who used to make and vend the poison. The Kisoma people also had an arrow poison maker. The poison is said to be compound of snake poison and certain herbs. Nearly all of these people wear sandals of a single thickness of skin when travelling.

Musical instruments.—Their harps have eight strings and are the same as those of Northern Kavirondo (Figs. 8, 10); the drum is covered with cow hide; they are called *Thém*. Their drums are also similar to those of Northern Kavirondo and are called *Bûl* (Fig. 9). The women also make hand harps of sisosa stalks called *Odenda*.

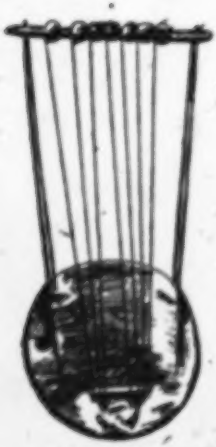

FIG. 8.—HARP: NILOTIC KAVIRONDO.

FIG. 9.—NATIVE OF LIRO TRIBE, JA-LUO GROUP. PROTOMORPHAL DAUNER.

FIG. 10.—REED HARP FROM KAVIRONDO.

Tobacco and bhang.—These people smoke and chew tobacco; only a few take snuff. Both sexes smoke and chew tobacco. *Bhang* or Indian hemp is smoked separately in a water pipe. Only men smoke *bhang*. Young fighting men are not allowed to smoke it.

Pombe or pombe.—This is made from sisosa or wimbi either singly or mixed. Both sexes drink; young women do not drink with the men, the old women however do so.

Kavirondo Warriors (Ja-Luo).

[p.358]

227 or four in a line on the bottom. They then go some distance in front and frighten the fish into the traps. The single cone traps are used by the women in a different way. They hold the baskets in both hands with the wide part facing towards them and wade backwards in shallow water drawing the backets along the bottom towards them. When the fish enter the basket they raise it out of the water in a perpendicular position. The following fish are caught by this means: Nyawino, Ndera, Ningu, and Akunga (eels). The Ningu is not caught in rivers during May, June and July as it goes to the Lake then presumably to spawn.

BASKET TRAPS USED AT WEIRS.

226 Enormous fish weirs (Dholuo, Kek) are a feature of the rivers of
227 Kavirondo. Some of these are built of wood and some of stones and extend right across the rivers from bank to bank. At intervals in the weir there are gaps and basket traps (Dholuo, Musathi) are used on the upper side of these holes to catch the fish as they pass through up stream. The Musathi are similar in principle to the double coned Aunga, gut are made of reeds fastened together longitudinally, while all types of Aunga are plaited.

PORTABLE TRAPS.

Another form of basket fish trap is the Sienyu. This is also a conical basket with a hole at the top or narrow end. The native using it wades along in shallow water pushing it down at intervals on to the bottom of the lake or river. If a fish happens to be imprisoned it is heard splashing inside and the native puts his arm through the top hole and pulls it out. The Sienyu is also made of reeds fastened together longitudinally.

STATIONARY TRAPS, BAITED.

In addition to the foregoing there is another kind of basket trap used called Omuongo, which is almost identical with a European lobster pot and used with bait and in the same way.

FISHING SPEARS.

226 Fish are sometimes harpooned by natives wading in the water.
411 The harpoon used is narrow and has no barb and is called by the Jaluo Bedthi. Mumi and Kamongo are speared in this way.

The natives of Mohuru are said to go out in canoes on moonlight nights with grass torches and harpoon the fish.

FISHING WITH ROD AND LINES.

226 Fishing with rod and line is indulged in principally as an amuse-
227 ment and by juveniles. Long rods made from a tree called Poo are used by men. Hooks (Dholuo, Oloo) are bought in the bazaar. The bait used is a sort of worm (Dholuo, Oniambo) found in the mud. Mumi (barbel) are caught in this way. The line is made from

The warriors are armed with long-bladed spears and use large shields three feet high and of a V shape, behind which the bearer crouches and is completely hidden. The shields are made of cow-hide and are so dried that they are hard enough to resist a spear-thrust. Each warrior is painted with red and white clay in fantastic designs and wears a head-dress. Some of the head-dresses are like helmets adorned with ostrich feathers, while others are small straw hats such as a child's doll might wear.

The battle is decided when the cattle are carried off by the one party or when the other party prove themselves strong enough to retain them. The victors dictate terms of peace and the vanquished pay a fine in cattle and women.

Treatment of a warrior who has slain one of the enemy. When a warrior kills another in battle, he is isolated from his village, lives in a separate hut some four days, and an old woman cooks his food and feeds him like a child because he is forbidden to touch any food. On the fifth day he is escorted to the river by another man who washes him, a white goat is killed and cooked by the attendant, who feeds the man with the meat, the goat-skin is cut into strips and put upon the man's wrists and round his head, and he returns to his temporary home for the night. The next day he is again taken to the river and washed, and a white fowl is presented him. He kills it and it is cooked for him, and he is again fed with the meat. He is then pronounced to be clean and may return to his home. It sometimes happens that a warrior spears another man in battle and the latter dies from the wound some time after. When death takes place, the relatives go to the warrior and tell him of the death, and he is separated at once from the community until the ceremonies above described have been performed. The people say that the ceremonies are necessary in order to release the ghost of the dead man, which is bound to the warrior who slew him and is only released on the fulfilment of the ceremonies. Should a warrior refuse to fulfil the ceremonies, the ghost will ask, "Why don't you fulfil the ceremonies and let me go?" Should the man still refuse to comply, the ghost will take him by the throat and strangle him.

14: Johnston G-4, 5 (no date) 1904 FL11 Luo FL11

Both sexes drink the *beer* which is made from grain, but the women never drink with the men. The women make the *butter*.

The men do not *smelt iron*, but obtain it in pig form from the Bantu Kavirondo. There is even a certain prejudice against *blacksmiths* amongst the Ja-luo. They are called "Yothetth," and among some of the tribes constitute a separate caste called "Uvino." They *forge* spears, knives, bill-hooks, and axes, but their hoes are imported from their Bantu neighbours. *Shields* are made of buffalo or ox hide, and also of ambatch wood. Their *spears* have small heads, and shafts of tremendous length. They use *clubs*, and also long leaf-shaped swords, which they have borrowed from the Masai or Nandi. Bows and arrows are still employed, but the arrows are no longer poisoned. Poison was said to be derived from the venom of snakes, and also from certain herbs. Their musical instruments are very similar to those of the Kavirondo Bantu.

Girls are betrothed at the age of seven, and go to their husbands at the age of ten or eleven, payment being made by degrees over the years elapsing between the betrothal and the *marriage*. The girl is taken by her unmarried girl companions to her husband's house. The father of the girl kills an ox and takes the meat, together with a quantity of sorghum porridge, to the bridegroom's house to provide a *wedding feast*. On the following day the bridegroom's brothers, and his other wives, if he has any, take the newly wedded wife back to her father's village, where there is another great feast. The bridegroom does not attend. The father of the girl next day presents his daughter with a goat, and she returns to her husband, who continues to make payments to his father-in-law. The total amount of the marriage payment may reach to six cows, or their equivalent. If the man stops paying, his wife will leave him and go back to her father's village until the payments are resumed. If within a year of the marriage the woman does not bear a child, the husband may stop his payments, but he has no claim to the return of what has been already paid, so long as his wife remains with him. If a wife dies without having borne children, the amount paid for her is returned, unless the husband agrees to accept one of his *deceased wife's sisters*, for whom only a small complimentary present is paid. If a woman refuses to stop with her husband, she is given to another man, and whatever this man gives for her is paid over to her first husband. If a woman has a child and is ill-treated, she may leave her husband, but must leave her child behind with the father. If the child be a boy, when he grows up and the mother gets old she generally returns to live with her son. If after a marriage has been arranged an avaricious father is loth to part with his daughter, the young man employs his friends to waylay the girl in the daytime. If, however, the girl after capture refuses to stop with her

towards marriage, that anyone who touches this tassel has to pay a fine of three goats to the husband.

The women do not wear iron wire to the same extent as their husbands and brothers. These may frequently be seen with from six to ten pieces wound round their arms and legs, which shine from constant rubbing and polishing with oil and fat. Happily there are signs that this wire is going out of fashion, whereby they will be spared the sores and ulcers which are its continual accompaniment. Trade generally will thus be put upon a sound cash basis instead of resting as it has done upon a precarious footing of barter. The Jaluo, who are keen traders, have begun to realise the advantages of the rupee over the iron, being helped to this conclusion by the necessity of having to pay three rupees a year for every hut.

The Jaluo full dress is very striking. A huge hat of monkey or goat skin, or of feathers, often of ostrich, surmounts a well-oiled visage which is ornamented by lines of small white beads across the forehead, nose, upper lip and chin and fastened behind the ear. Round the neck are strings of beads, brass cartridge cases, fetishes, and a round or two of iron wire. Across the chest and sometimes down the back are rows of cowries sewn on to strips of leather; and over the right shoulder hangs a big black feather boa, or an ornament made of the long hair from the wildebeest's tail. The everyday goat skin is discarded. Round the waist they fasten strings of iron beads which they manufacture from iron wire; the iron has an extra polish, and from it depend bunches of feathers. The body is well oiled and sometimes covered with red clay or charcoal. Finally they fasten to the knee and ankle small bells made of iron wire in the shape of broad-bean pods and with one or two small iron beads inside.

Their weapons consist of a spear with a long haft and a short blade, a Masai sword on the right hip and occasionally a bow and arrows instead of the spear. Their shields are very large and heavy, made of buffalo hide and of a peculiar shape; vertically they are about three feet six inches in height; horizontally nearly six feet in length and curved back so that the left side, back and front of the warrior are covered; they are painted red, white and black, often in artistic designs. These designs probably at one time indicated to what family the owner belonged; to-day, however, this idea, if it ever existed, seems to have quite disappeared, each man painting on his shield the pattern which pleases him most. Further investigation on this subject should be made in order to make certain whether the patterns have any peculiar meaning.

Some wear the hair long, twisting it into long thin strings and dressing it with oil and red clay or charcoal. Others partially shave the head, always leaving at least one little tuft, which is cut off and worn by the chief mourner at the owner's funeral. Sometimes the body is striped or spotted with yellow clay in imitation of the zebra or leopard.

Politically the Jaluo are in a semi-feudal state; the tribe is divided up into larger or smaller chieftaincies or clans, which correspond to the old baronies, but there is no one overlord to make the resemblance complete. Nominally the chiefs
